

May 2010 - Craig Buller (zeebull)

Congratulations Craig on winning TOTM for May with your sustainable and flourishing LED driven tank.

Craig is known simply as zeebull on the RTAW forums and you can find out more about his tank in his Tank Journal .

Introduction

Well it all started about 20 years ago when I kicked the goldfish out of my little 2x14x14 tank , threw some coral rubble over the under gravel filter added a piece of bleached dead coral a couple of fake corals and a tomato clown and a blue damsel.From that day on I was hooked on this amazingly addictive hobby. My next tank was a standard 3 ft tank with chipboard stand and crazy wet dry filter set up with rotating spray bar that spent more time stationary than on the go.I then purchased a 4x18x20 complete package from pet city which I had for over ten years which got me through to my current tank.

The Tank

Display tank is a 5x2x2 with a 48x15x16 sump giving about 600lt total water volume.Which has been running since about October 2007 with all the stock from the old 4 ft tank transfered over.I decided to have a go at making the stand and hood myself which is 920 mm high and considering it was my first go at building anything since school, it turned out pretty good.

{mosimage cw=300 popup=1}

Filtration

Natural filtration is handled by live rock in display and DSB and macro in sump. I have chosen to go bare bottom in the display after seeing the amount of detritus build in the sand bed of the old tank despite regular vacuuming. Mechanically I run a ATB medium skimmer, filter sock, purigen and nitrate/ phosphate reducing Bio pellets in a fluid bed filter.

Water Flow

2x mp40w Vortechs (which I change to different modes every now and again)

1x 6045 Tunze nanosream

{mosimage cw=300 popup=1}

Lighting

I started of with 3x 150w metal halides and 2 t5 tubes but recently swapped over to 3 x 70w Eco lamps kr92 LED lights which I purchased through the MASA group buy. I run these at 2 hr sunrise

8 hr full daylight

2 hr sunset

3 hr moonlight

Other equipment

Have tried to keep the tank fairly simple so apart from Teco tr20 chiller and homemade auto top off everything else is handled manually.

{mosimage cw=300 popup=1}

Water parameters

Must admit this isn't something I check to often any more unless things don't seem right

PH - 8.2 PH pen

SG - 1.024 refractometer

KH - 9 on Salifert

Calcium - 400 on Salifert

Nitrate - 1 on Salifert

PO4 - 0.16Hannameter

Temp -around 25-27

Additives and conditioners

I drip 5lt of lime water every night to keep Calc And Alk levels right and also add a teaspoon of Aqua Z Calc and Alk powder twice a week which I find keeps everything pretty much were I want it. Was using Some of the Zeo products, coral vitaliser, sponge power and amino acid but have just started using some of the prodibio products. I use DIY fish food and spectrum pellets to feed the tanks inhabitants.

{mosimage cw=300 popup=1}

Fish

1x Paracanthus hepatus-blue tang

1x Zebrasoma flavescens-yellow tang

1x Zebrasoma xanthurum- purple tang

1x Pterosynchiropus splendidus- mandarin

1x Gobiodon okinawae- yellow coral goby

2x Amphiprion ocellaris- nemo, clownfish

1x Chromis atripectoralis- green chromis

1x Centropyge bispinosus-coral beauty

1x Gramma loreto- royal gramma

2x Pseudanthias dispar-dispar anthias

Coral

A mixture of hard and soft corals including

Acropora sp.

Millepora sp.

Stylophora sp.

Pocillopora sp.

Montipora sp

Ricordea sp.

Anthelia sp.

Xenia sp.

Lobophyllia sp

Scolymia sp

Sympyllia sp

Euphyllia sp

Acanthastrea sp

Gorgonian sp

clams

I'm sure theres more in there but thats what comes to mind at the moment.

{mosimage cw=300 popup=1}

Inverts

1x Red hermit crab

numerous Acro crabs and the odd hairy fellow

1 x 3 inch mantis shrimp that now resides in the sump

plenty of turbo and trochus snails

some scary looking bristle worms, brittle stars and lots of copepods ,mysis etc.

{mosimage cw=300 popup=1}

Maintenance

Try to change about 100 lt every couple of weeks but being in Toowoomba doesn't make that to easy.(thankfully Paul from Clear Oceans comes up every 3 months or so with some water)

Clean the glass once or twice a week and skimmer cup at the same time.

Acknowledgements

Despite being in the hobby for more than 20 years it has only been in the last 5 or so since finding MASA that my knowledge and ability to maintain the wide variety of stock now available to us has become a reality. So a big thank you goes out to all the members that I have learnt so much from. Heres looking forward to the next 20 years(if all goes well)

Cheers

Craig
